ABOUT ME

Backend/Software Engineer with 6+ years of experience.

I focus on building reliable and scalable backend systems, designing clean APIs, and supporting services throughout their full lifecycle.

WORK EXPERIENCE

PlayQ | Backend Engineer | Apr 2019 – May 2026

Kyiv, Ukraine

Worked as a part of Backend Services Team:

- Implemented and maintained backend services for production systems
- Developed new features, improved existing functionality, and fixed bugs across backend components
- Implemented integrations with external systems
- Supported and contributed to shared internal libraries

Intetics | Software Engineer | Aug 2015 – Apr 2019

Kyiv, Ukraine

- Participated in developing of an application for book reading and studying.
- Worked across multiple parts of the product, including UI, backend services, and mobile applications.
- Implemented new features, fixed bugs, and supported existing functionality.
- Provided customer support, investigated user issues, and helped resolve product-related problems.
